

Rayen HAJJEM

PhD Student / Embedded Systems Engineer / Connected Systems Engineer

in rayen-hajjem ☎ +216 28 358 546 ✉ rayenhajjem04@gmail.com
✉ Rayen.hajjem@enis.tn 📍 Beni Hassen, Monastir, Tunisia

Profile Summary

PhD Student at STA Lab and Engineer specializing in Connected Systems Engineering. Skilled in Electronics, Embedded Systems, and IoT, with experience in intelligent embedded architectures, AI integration, secure IoT communication, and sensor data optimization. Passionate about advancing smart and connected technologies through research and innovation.

Education

National School of Engineering of sfax, University of Sfax PhD Degree – Electrical Engineering.	in present
National School of Electronics and Telecommunications, University of Sfax Engineering Degree – Electronic Communication Systems (Connected Systems).	2023–2025
National School of Electronics and Telecommunications, University of Sfax Professional Master – Electronics, Electrical Engineering and Automation (Industrial Informatics).	2022–2023
ISET Mahdia Bachelor of Science – Electrical Engineering (Automation and Informatics).	2019–2022
Lycée Jammel 1 Baccalaureate in Technical Sciences.	2019

Internships

Mitacs Research Intern – Ontario Tech University (Canada) <i>RTEMSOFT Lab – Quantum Computing in IoT.</i>	May–Aug 2025
Engineering Intern – LEONI Tunisia	Aug 2024
Summer Intern – FirmaIQ, Sousse	Jul–Aug 2024
Master Intern – DRAXLMAIER Group	Jul–Aug 2023
End-of-Year Intern – Sartex Group	Feb–Jun 2022
Industrial Intern – STEG Tunisia	Jan–Feb 2021

Key Projects

Enabling Quantum Computing Application in IoT Developed Prototype quantum-IoT system using PennyLane, Qiskit, MQTT, TensorFlow, Python.	May–Aug 2025
Infected Tomato Detection Developed a computer vision model using CNNs and Flask for real-time classification.	Jan 2025
COVID Detection Web App Web application for COVID-19 detection using Flask and Deep Learning.	Nov 2024
Agriculture Remote Control System IoT-based farm control system with ESP32, MicroPython, LoRa, Firebase.	Jul–Aug 2024
Water Pollution Monitor RC Boat ESP32, GPS, pH sensors, and Firebase for real-time water quality tracking.	Apr 2024
Energy Management Web System IoT interface using ESP32 and Firebase for power consumption monitoring.	Jan–Apr 2024

Certifications

Data Sciences (cisco) | Data Analytics (cisco) | Scrum Fundamentals | DevOps Scrum | Six Sigma Yellow Belt | Microsoft Azure | Mini PMP | Industry 4.0 | KNX associate | Digital Marketing

Experience & Awards

Jury & moderator of EnetAero cup | Senior Member- Aero enetcom | 2nd Place – Instart Hackathon (2023–2024)
| Project Manager – Enactus ENET'Com Club | Marketing Manager – ACTS Club | HR Manager – Pingo IT

Technical Skills

Languages: Python, Java, Kotlin, Flutter, C/C++, VHDL, HTML, CSS, JavaScript.
Tools: TensorFlow, Qiskit, VS Code, Android Studio, Eclipse, Anaconda, ModelSim, Altium, ADS, MATLAB, LabVIEW.
Hardware: STM32, Raspberry Pi, Orange Pi, Arduino, ESP32, ESP8266.

Languages

Arabic (Native) | French (Professional) | English (Intermediate)
